

The Australian Ceramic Society and Materials Australia invite you to attend the 9th in the series of Pacific Rim Conferences on Ceramic and Glass Technology, incorporating MA2011, Materials and Austceram 2011.

The event returns to Cairns, Australia following on from the successful PacRim 2 conference held here in 1996. This truly international meeting and networking event will be held in the multi-award winning **Cairns Convention Centre, between 10th to 14th July 2011. Mark these dates in your calendar!**

For scientific equipment manufacturers, service providers and other commercial organisations, this event presents a fantastic opportunity to showcase your products and services to a high quality audience brought together at a single venue.

The following symposia topics are under consideration:

- Advanced Powder Processing
- Bioceramics
- Ceramic Coatings
- Ceramics Enabling Environmental Protection
- Ceramics for Energy Generation
- Ceramics & Ceramic Matrix Composites
- Computational Materials Research & Design
- Electroceramics
- Geopolymers
- Glasses & Ceramics for Nuclear and Hazardous Waste Glass Science & Technology
- Glasses for Optoelectronics and Optical Applications Engineering
- Fuel Cells and Hydrogen Storage Materials
- Microwave Materials
- Nano powders and Nanostructured Materials
- Novel Processing and Manufacturing Technologies
- Photocatalytic Materials
- Refractory Technology
- Synthesis and Processing
- Thermal Management Materials

More information will be circulated via your local ceramic society soon and a "Call for Papers" will issued in early 2010.
