

# Journal of the Ceramic Society of Japan

## Call for papers

### **“Special Issue on the 17th International Conference on Physics of Non-Crystalline Solids (PNCS17)”**

Glass is an essential material for our daily life, as represented by the optical fiber, display or solar panels, and safe containers, etc., which play important roles in achieving the Sustainable Development Goals (SDGs). The 17th International Conference on the Physics of Non-Crystalline Solids (PNCS17), to be held at the Tsukuba International Congress Center on August 10–13, 2025, will be the second time in 38 years since 1987 that this international conference was held in Japan. Leading researchers on amorphous materials from Japan and abroad are expected to participate in the conference, which is expected to show Japan's presence in the field as well as the International Congress on Glass (ICG) 2028, which will be held in Japan in 2028. We would like to propose the publication of a special issue of PNCS17 in the Journal of the Ceramic Society of Japan in the hope that Japan's activities in amorphous materials will be disseminated to the world and that research in this field will continue to grow in Japan in the future.

#### Editorial Committee

##### Chief Guest Editor:

Shinji Kohara (National Institute for Materials Science)

##### Guest Editors:

Hideki Hashimoto (Kogakuin University)

Hirokazu Masai (National Institute of Advanced Industrial Science and Technology)

Submission Deadline	Aug 31 2025
Scheduled publication	Issue Dec 2025
Submission URL	<a href="https://mc.manuscriptcentral.com/jcsj">https://mc.manuscriptcentral.com/jcsj</a>
Issue Type	Special Issue on PNCS17
Language	English
Article Types	Regular article or Review (see Instructions for Authors of J. Ceram. Soc. Jpn.)
Refereeing	As per regular issues
